

## FALCON: Smart Portable Solution

Condition monitoring has never been so easy!!

With **FALCON**, **ONEPROD** offers a collection, analysis and balancing tool with outstanding performance, accessible to all users.

**ONEPROD** has distilled its 25 years of experience with condition-based maintenance into **FALCON**. Highly experienced and novice users alike can now easily monitor machine vibrations and obtain highly pertinent results.

## CONDITION MONITORING FOR ANYONE

### A HOST OF INNOVATIONS

**FALCON** provides the best that technology has to offer, in an innovative product meeting the needs of all users.

Powerful yet easy to use, **FALCON** makes optimum productivity available immediately.

Right from the outset, **FALCON** stands out with its wireless sensor, large color touch screen, automatic detection of measurement points via QR Codes, built-in accessories including a pyrometer, stroboscope and camera, shock-resistant design, and more.

Nothing has been left to chance!

AUTOMATIC CONFIGURATION

AUTOMATIC DIAGNOSIS

ALL-IN-ONE

# → RELIABILITY IN AUTOMATIC MODE!

## AUTOMATIC CONFIGURATION

Any user can now set up vibration monitoring configurations with no expert assistance: All it takes is a straightforward kinematic description of the machine in the visual tool.

Child's play!

## AUTOMATIC DIAGNOSIS

**FALCON's** built-in automatic diagnosis module provides unbeatably relevant and dependable results.

All faults commonly encountered in industry, such as unbalance, misalignment, defective mountings, looseness, friction, structural resonance, lubrication defects, bearing defects, gear defects, pump cavitation and more, are detected.

Faults are identified in clear and accurate language, and displayed with an associated confidence level. The result, displayed instantaneously, can be understood by all.

## FALCON TAKES THE MYSTERY OUT OF VIBRATION ANALYSIS

The **FALCON** automatic diagnosis engine packs **ONEPROD's** 25 years of experience in vibration monitoring for condition-based maintenance. Validated in real-life situations and on historical data from numerous companies, **FALCON** provides automatic diagnosis with unequalled accuracy and reliability of over 80%!

# → OPTIMAL PRODUCTIVITY

## WIRELESS

The exceptional measurement capabilities of the **FALCON** three-axis wireless sensor make a genuine contribution to productivity. Synchronous acquisition reduces data collection times.

After quickly mounting the wireless sensor, measurements can be made remotely and safely.

Data point identification and sensor positioning are automatic. The monitoring controls repeatability is thus ensured. Most measurement errors stem from connections and wiring: with **FALCON** this is a thing of the past.

## UNRIVALLED PERFORMANCE

**FALCON** offers exceptional real time processing capabilities, making it the fastest collection device on the market! Monitor more machines, more quickly, without sacrificing measurement quality.. Synchronous acquisition of four vibration channels in addition to the speed of rotation enables even the most complex problems to be diagnosed.

## QUICK AND EASY BALANCING

With automatic simulation tools and assistance in positioning weights, **FALCON** is the benchmark tool correcting unbalance issues on site.

**FALCON** provides intuitive visual assistance to guide users through operations. The results are automatically compared against standards to ensure accurate balancing. A report showing all data, graphs and photos is automatically generated in a single click!

**FALCON** reduces intervention times:

- Wireless three-axis measurement
- Real time processing
- User guidance

At the scale of an industrial site,  
**FALCON** really stands out!

# THE NEW GENERATION IN CONDITION-BASED MAINTENANCE

## QUICK AND EFFECTIVE

- Synchronous three-axis collection with a single sensor
- Simultaneous 4-channel acquisition at 40 kHz + tachometer, 2 channels at 80 kHz
- Real time processing
- Long time waveform, up to 80 seconds at 51.2 kHz (4 Mega samples)

## WIRELESS

- Measurements taken in total safety
- Enhanced productivity: easily installed with one hand, reducing intervention time
- No measurement errors
- No wires: reduced maintenance and transport costs

## AUTOMATIC

- Automatic configuration
- Automatic diagnosis
- Automatic recognition of measurement points

## 7" DISPLAY

- High definition
- Readable even in bright sunlight
- Touch screen usable with gloves

## COMMUNICATING

- USB, WiFi, Ethernet, Internet
- Remote display mode: the **FALCON's** screen is displayed on a PC
- Remote control of the CMS platform
- Results easily exchanged via the **SUPERVISION** tool

## ALL-INCLUSIVE

- Built-in rotation speed measurement (stroboscope)
- Built-in pyrometer with laser sight
- Built-in camera for recording sensor positions, inspection photos, and so on

## SUITABLE FOR HARSH CONDITIONS

- ATEX Zone 2 certification
- IP65
- Withstands a 2-meter drop

## ACOEM

Smart monitoring, diagnosis & solutions

ACOEM offers comprehensive products and services comprising smart monitoring, diagnosis and solutions, drawing upon its unique expertise in the field of vibrations and acoustics.

ACOEM contributes to the improvement of:

- quality of life and risk prevention in urban and industrial environments
- productivity and the reliability of industrial processes
- the design of robust and high-performance products with low noise levels
- protection of sites, vehicles and people in hostile environments

With its O1dB, METRAVIB and ONEPROD brands, ACOEM works with decision-makers in industry, defence and the environment throughout the world.
